

Service Travel Zones & Annual Travel Charges

Preventive Maintenance Service Plans

PureLine Treatment Systems provides preventive maintenance (PM) service for chlorine dioxide generation systems nationwide. All service personnel are dispatched from our headquarters in Bensenville, Illinois. To ensure consistent service quality and transparent pricing, annual service plans include a travel & logistics charge based on geographic service zones.

*Travel zones are defined for pricing purposes & are not strict mileage boundaries.

Why Travel Charges Are Required

Preventive maintenance visits require skilled technicians, specialized tools, and careful scheduling. While every effort is made to plan routes efficiently and group service visits when possible, travel costs vary significantly based on distance, time, & logistics. These charges allow us to maintain qualified staff, predictable scheduling, and consistent service standards across all regions.

Annual Travel & Logistics Charges

The following annual adders apply to PM service plans and are in addition to the base service plan price (Zone 1):

-  **Zone 1 Local** (No add. charge)
-  **Zone 2 Regional** (\$3,250 per year)
-  **Zone 3 Mid-Distance** (\$6,250 per year)
-  **Zone 4 Cross Country** (\$9,000 per year)

*All pricing is reviewed periodically and may be updated to reflect changes in travel and labor costs.

What the Annual Travel Charge Covers

- Airfare or mileage
- Lodging
- Ground transportation & rental vehicles
- Scheduling, coordination, & logistics
- Meals and incidentals
- Technician travel time

*Charges reflect typical route planning efficiency over the course of the year & are not billed per trip or per visit
